

Cato Networks:

The *Simpler, Smarter* Network & Security Platform

Outdated security tools can't keep up with hybrid work, cloud apps, or rapid growth. Cato replaces it all with a modern, cloud-delivered platform, so you can say bye to routers, firewalls, and VPNs for good.

Meet the Cato Socket

The Cato Socket is a compact edge device that provides SD-WAN functionality over any internet connection – fiber, LTE, cable, and more. Unlike traditional routers or firewalls that process traffic on-site, the socket establishes an encrypted tunnel to the nearest Cato PoP, where all routing, security, optimization, and inspection take place. This cloud-native approach eliminates on-site complexity and makes your network easier to scale, manage, and secure.

What Makes Cato Different?

The Cato Socket is simple to manage, easy to scale, and built for how businesses work today.

- ✓ Connect your location to Cato Cloud via any internet type
- ✓ Build an encrypted tunnel to the nearest Cato PoP
- ✓ Offload routing, security, and optimization to the cloud

Secure Remote Access Without VPNs

Need to give remote users fast, secure access from anywhere? The Cato ZTNA Client makes it possible – without split tunnel headaches or performance loss.

Connect directly to the nearest Cato PoP

Enforce security policies in real-time

No backhauling or legacy VPN bottlenecks

The result is cloud-delivered security that follows your users *wherever they work.*

CATO
NETWORKS

Benefits of the Cato Platform

Agility & Speed

Deploy new sites or users in just days, not weeks.

Lower Costs

Eliminate CapEx and reduce administrative overhead.

Security & Compliance

Built-in zero trust access and centralized policy control.

Better Performance

Private global backbone optimized for app integrations.

Simplified Operations

Full visibility and control from a single dashboard.

Scalability & Future-Proofing

Scale instantly, no hardware refreshes required.

Why Aseva + Cato?

With Cato, you're not just replacing hardware – you're transforming your network for the cloud era. Aseva is here to help you through that journey, from evaluation to implementation and beyond. Trust us for:

- ✓ Expert guidance based on 30 years of helping businesses simplify IT.
- ✓ Deep knowledge of the industry and every solution on the market.
- ✓ White-glove support from real people who care about your success.

Ready to modernize your network?

Get started with Aseva today.
